Plaswood Product Range - FENCING & GATES

Plaswood recycled plastic fencing is an environmentally superior alternative to traditional timber fencing. Our recycled plastic fences and gates will not rot, splinter, crack or degrade with age. Unlike conventional timber fencing, Plaswood requires no annual maintenance, staining or painting.

Knee Rail Fencing

Depending on your choice of fencing, rails and posts will either be face fixed or mortised. Posts are available with flat, chamfered or bevelled tops for trip rail fencing.

Close Board Fencing

Plaswood Close Board Fencing is used to form a solid screen, similar to picket / pale fencing. The pales are fixed to both sides of the rails and staggered to create the look of a close board panel.

Picket / Pale Fencing

Plaswood Picket/Pale Fencing can be used in conjunction with either the face fixed or mortised post and rail types. Picket/Pales are face fixed onto the rails vertically and positioned just above ground level to the top of the post.

Post and Rail Fencing

Plaswood Post and Rail Fencing can be used in conjunction with either the face fixed or mortised post and rail types. Rails are face fixed onto the posts horizontally and positioned parallel to each other.

Log Roll Fencing / Revetment Wall

Plaswood Log Roll Fencing or edging is ideal to use in curved borders, or edging. It can be used as part of water retaining walls, edging walls, flower beds or just to create garden features.

Birdsmouth Fencing

Birdsmouth fencing is ideal for creating an attractive and strong boundary. Posts supplied with a V cut for simple and quick installation. Fixing straps available.

Technical Installation Guide - FENCING & GATES

Please allow for expansion and contraction which would necessitate a 10mm-15mm expansion gap between rail ends inside post joint and when drilling rails to posts, drill holes should be slightly oversized by 3mm to accept screws or, as an alternative method, insert a 10mm slot which will allow movement in the fencing. Fully tighten all screws and then back turn screw, half a turn, anti-clockwise. Use standard 3.1 metre lengths of rail by staggering the rail joints 1 metre to 1.55 metres maximum between posts.

ADDITIONAL OPTIONS - TOPS AVAILABLE FOR POSTS:

Black posts can have either flat, chamfered or bevelled tops. All birdsmouth/trip rail posts have inverted V notches. Brown, grey or green posts are flat tops only.

MORTISING REQUIREMENTS:

A mortising service is available to accept the rails for intermediate, corner and end posts. We need clarification on where the mortises need to be positioned on the posts when an order is placed.

TOPS AVAILABLE FOR PICKETS/PALES: Flat, Semi-Circular or Pointed.

HEIGHTS OF FENCING:

- 4' (1220mm) above ground level
- 5' (1525mm) above ground level
- 6' (1830mm) above ground level

SECTIONS RECOMMENDED - POSTS: All Posts 100mm square x height required and an additional minimum of 500mm for below ground fixing.

BIRDSMOUTH RAILS: 80mm square x 3100mm long or 100mm square x 3100mm long.

RAILS: Depending on your choice of fencing colour, use 50mm x 100mm or 50mm x 120mm rails for post and rail types that will either be face fixed or mortised. 40mm x 100mm or 40mm x 120mm rails for picket and pale or close board types and for birdsmouth / trip rail types, 80mm square or 100mm square.

PALES / PICKETS: Black, brown or grey pales would be 20mm x 100mm, green pales would be 35mm x 105mm

RECOMMENDED CENTERING OF POSTS: No more than 1500mm.
